

WELCOME TO THE WATES INNOVATION NETWORK (WIN) PORTAL

WORKING TOGETHER TO DEVELOP A MORE SUSTAINABLE FUTURE

DO YOU WANT A ZERO CARBON FUTURE?

Of course you do! So let's talk about how simple innovations can make a big impact, creating happier and healthier lives for your people and your buildings. Wates Innovation Network (WIN) portal can connect you with sustainable innovations to help accelerate the transition to net zero.

INTRODUCING THE WIN PORTAL

A TRUSTED SOURCE OF SUSTAINABLE INNOVATION

If you want to reduce carbon emissions, cut operating costs or make energy savings, the WIN Portal is a new digital, interactive and intelligent 'go-compare' style website which will connect you with verified suppliers of sustainable innovations. **Anywhere, Anytime.**

All of the suppliers that are featured on our portal have been checked and vetted by our in-house experts. A number of these cutting-edge, market-leading sustainable technologies are endorsed and already in use with top businesses across the UK.

HOW DOES THE WIN PORTAL WORK?

The portal allows you to browse and filter by the benefits that you want to achieve for your building's lifecycle stage, meaning that no matter at what point of the development stage you are at, whether that be design, construction or in operation, there is a technology to suit your needs. Once you have filtered the products to match your requirements, you can click on that supplier and discover:

- » What the product is
- » How it performs
- » Benefits
- » Case studies with tangible savings
- » Direct contact details for the supplier.

IT'S A
WIN WIN
FOR ALL

PROTECT THE ENVIRONMENT & CUT COSTS! WIN!

BENEFITS OF USING THE WIN PORTAL

- » Reduce your building's carbon emissions
- » Improve energy efficiency
- » Optimise building performance
- » Improve health and wellbeing for building users
- » Cut your operation costs
- » Meet yours and the government's sustainability targets
- » Support SMEs and encourage equity in the local economy
- » Promote the triple bottom line of profit, people and the planet
- » Pre-approved partners as verified by our in-house experts.

A GREENER FUTURE STARTS HERE

“The Wates Innovation Network ‘WIN’ and working closely with Wates has been a very **powerful, effective tool**... It will help us develop our ambitious new set of operational climate pledges.”

- Engineering, Resilience and Sustainability Manager for a leading retail banking company

“Working with Wates made it easier for us to source and implement innovative technologies, for **clean and green savings and efficiencies** across our property portfolio.”

- Global Head of Energy, leading Financial Services Company

“Finding the route to market is always difficult and finding the key people to pitch the ideas and products to is even harder. ‘WIN’ helped to find those people and **provided us with an environment in which to explain our product.**”

- Simon Goodchild, Managing Director, Magnatech Limited

“95% of market ready sustainable technologies never get considered because key decision makers are not aware of these products and suppliers don't have access to the key corporate decision makers. At Wates our aim is to **bridge this gap.**”

- Dr. Zainab Dangana MCIQB PHD
Sustainable Technology Services Manager
