

How is RDP good for the whole community?

A Highways England
Perspective

Martin Perks
RIP North Commercial Director

What's our long term problem?

How does RDP help?

How does Regional Delivery Partnerships (RDP) allows better collaboration between Highways England and Delivery Integration Partners (DIPS)

A DIP has to build an IPT
(Integrated Project Team)

The IPT shares in our 100% gain
share opportunity if it beats the
Budget.

This means key suppliers are
essential in design stages to:

- Make work safer
- Offer innovation
- Improve logistics
- Easier to construct
- Be more predictable
- Right first time
- Reduce waste

Highways England is part of the IPT

So, help us to understand what you can do, so we can:

- Be safer
- Be less disruptive to traffic
- Be right first time
- Be socially responsible
- Be net zero carbon
- Improve payment terms
- Reduce risk

MAINTENANCE & CONSTRUCTION EMISSIONS

Net zero by 2040

Success = Exceed investor expectation

This is now a team sport

So, you should be expecting:

- Longer terms awards
- IPT relationships
- Trust based trading
- Earlier engagement
- Being part of design
- Sharing in project Gain
- Sharing in project Pain
- To be asked for innovation
- Carbon reduction challenge
- Social value challenge
- Apprentices challenge

An aerial photograph of a multi-lane highway under construction. The road is partially paved and partially dirt. Several large trucks are visible, including a white OOOO semi-truck, a black STALKERS truck, and a white van. The sky is overcast and blue-tinted. The word "Thanks" is overlaid in white text in the center of the image.

Thanks
