

ENVIRONMENTAL POLICY

ACO Technologies plc designs, develops, manufactures and supplies Building Drainage, Waste Management and Surface Water products. As a minimum, we will do this in compliance with all applicable statutory obligations – exceeding these where possible to maintain market-leading credentials that better serve our customers, business and employees.

The Directors, Management and Staff are dedicated to upholding the highest levels of environmental responsibility across every aspect of the organisation. Through our Environmental Management System, accredited to ISO 14001, we constantly strive, in partnership with our suppliers and customers, to continually improve our energy efficiency and minimise our environmental and ecological impact.

ACO as a company is committed to offering real sustainable solutions in the form of the Collect, Clean, Hold and Release chain. We work with national bodies, regional planners and local authorities to develop environmental standards and guidelines for the sectors that use our products and services.

A handwritten signature in black ink, appearing to read 'MS Lane'.
