

Challenges:

Multitech Site Services faces a significant challenge in balancing the needs of clients and commercial requirements with the company's sustainability targets. To address this, the company has set a goal to reduce the environmental impact of its fleet of 40 vehicles and invest in new technologies and efficiencies.

In addition to reducing its carbon footprint, Multitech Site Services is also committed to fostering a culture of fairness, inclusion, and respect (FIR) throughout the organisation. This includes increasing diversity in both site and technical teams.

Impact:

Sustainability Focus: Partnering with the Supply Chain Sustainability School has had a positive impact on Multitech Site Services, not only in terms of focusing on key areas of sustainability but also in expanding the knowledge and skills of senior management and line managers.

The company has created a bespoke procurement pathway that allows for increased engagement and tailored training resources for specific employee groups.

Tailored Training: The webinars offered by the School have been of high quality, with the learning pathway available for "The People Pathway" supporting Multitech Site Services' objectives on FIR. The course content is varied and supports the needs of a variety of departmental heads.

Benchmarking Standards: Multitech Site Services also values the opportunity provided by the School's assessments to benchmark against industry standards and identify areas for additional training and awareness. Additionally, the e-learning resources provided by the School have been widely utilized across the business and are considered relevant and industry-specific.

Value gained:

Empowering Employee Knowledge: Through engaging with the Supply Chain Sustainability School, Multitech Site Services is able to provide its employees with the knowledge and skills necessary to effectively understand the requirements and sustainability drivers of its customers and supply chain.

The training content has been beneficial to all areas of the business, and the company actively encourages its managers to use the platform to enhance their continued professional development. This has helped improve engagement levels in teams and help them better understand the company's sustainability objectives.

Improving Sustainability Practices: The resources provided by the School are also utilised within Multitech Site Services' key

Design, Installation and Maintenance of temporary site services.

About

Since 1998, Multitech Site Services have been supporting the construction industry with an increasingly varied selection of specialist temporary site services. Working collaboratively with clients, and using expertise and knowledge to create value, develop relationships, and empowering people to safely build better communities.

performance indicators (KPIs) for teams in procurement and logistics. This allows for the expansion of knowledge and the improvement of practices across the company's supply chain.

Future proofing:

Multitech Site Services plans to expand its participation with the Supply Chain Sustainability School in key areas such as procurement and estimating. This will allow the company's purchasing and technical team members to access the School's content and expand their knowledge, enabling them to better inform customers and suppliers.

In addition, Multitech Site Services is in the process of developing its first sustainability strategy, and the School will play a crucial role in supporting this initiative.
