

## Challenges:

The primary challenge facing IG Doors is sustainability, particularly in relation to protecting the environment for future generations. As a major supplier of GRP and Steel Composite doors in the industry sector, the company recognises

the importance of sustainable collaborative working. To address this challenge, the company has implemented a suite of integrated certified ISO management systems, including ISO 9001, 14001, 45001, and 50001.

IG Doors is committed to promoting sustainable forest management and is a registered company with PEFC. The company calculates its CO2 emissions every year based on the three scopes of the Greenhouse Gas Protocol, including facility management, mobility, office supplies, incoming and outgoing logistics, packaging, and the primary materials used in all manufactured products.

By implementing these sustainable practices, IG Doors is demonstrating its commitment to protecting the environment and ensuring a better future for generations to come.

## Impact:

**Free resources to upskill colleagues:** IG Doors has actively engaged employees at all levels of the organisation with the Supply Chain Sustainability School's extensive online resources and learning pathways to enhance their understanding of sustainability issues. The resources provided by the School have facilitated an improved strategic awareness of sustainability, which has been beneficial for IG Doors.

**Sustainability benchmarking:** The self-assessment tools provided by the School have played a significant role in enabling IG Doors to acquire a detailed understanding of the future pathways for sustainability. The company will continue to use the self-assessment tools provided by the School to benchmark itself and ensure that it stays up to date with sustainability issues and knowledge. The goal is to use the insights gained through these tools to drive better sustainability outcomes within the company.

## Value gained:

**Collaboration:** One planet, One goal. The Supply Chain Sustainability School brings companies from all ranges of sectors together to achieve the ultimate goal, of helping protect the environment for future generations.

Manufacturer of GRP and Steel Composite doors

### About

For over 40 years, IG Doors has been a leading supplier to the new build and social housing refurbishment sectors. With a focus on quality and attention to detail, they have one of the largest production capacities available in the UK for both new build and refurbishment projects.

**Staff training & sustainability awareness:** The Supply Chain Sustainability School has enabled IG Doors to upskill its current workforce and promote sustainability within the company. The courses are comprehensive and informative, and the webinars have been greatly beneficial to the business. This approach aligns with IG Doors' business model and enables the company to bring its suppliers and customers on the journey with them. Additionally, it gives the company a competitive edge when competing for new business. Through its partnership with the School, IG Doors has been able to review its current processes and make them more efficient, including waste management and addressing environmental issues.

### Future proofing:

**Continued focus on knowledge development:** IG Doors will consistently invest in its employees' individual learning and development. The company encourages its staff to participate in the educational opportunities and training programs provided by the Supply Chain Sustainability School. IG Doors will also continue to utilise tools that facilitate collaborative work with customers, especially in areas related to sustainability.
