

FOCUS 2025

Key focus for 25/26

To share more knowledge and content on SBTi and carbon legislation in the form of new content and workshops

Get involved: Hattie.webb@actionsustainability.com

- **More support on how to submit to SBTi for a successful validation**
 - Organisations do not know how to submit to SBTi
 - E-learning module building of what we already have in the catalogue (NZ and SBT) and the Sustainability Short
 - School will provide this for free and aim it at the built environment
 - More organisations are being asked by their clients to get an SBT, and many don't know how to
- **More support with climate reporting legislation other than SBT, such as PAS 2080, CBAM, CSRD**
 - Provide support to partners and members on what the requirements are from the legislation - summaries of data requirements and timescales
 - More organisations are needing to report, and many don't know how to
 - In the form of new content
 - The school has content on climate and carbon reporting already but it is an evolving space and needs updating in workshops and in downloadable content
- **Need for consistent clauses and KPIs for carbon and climate, despite the issuance of PPN 01/24 and PAS, to give organisations better clarity and confidence in achieving sustainability outcomes**
 - New guidance material - link to Procurement Group
 - Needs to be tailored to the built environment and builds on what RICS WLCA has developed
