

Focus 2025

Key focus for 25/26

To develop resources and share more knowledge to support the decarbonisation of Plant, Tools and Equipment.

- **Establishing a Working Group to develop consistent telematics metrics and KPIs**
 - Organisations are struggling to get consistent telematics data to use for efficiency drivers.
 - There are also more people interested in how to collect Plant performance data and how to use that data for improvements.
 - Provides an opportunity to collaborate with Plant rental companies and their telematic suppliers.
 - In the form of new content.
 - Within Q1 of 25/26
- **More guidance on other non-fossil-fuel alternatives to fossil fuels**
 - CLC target to be 78% diesel free on all UK sites by 2035, means the need to move away from ICE plant, and more towards electric, H2 or other.
 - Resources needed reviewing feasibility of Lithium-ion batteries and other power forms, similar to the HVO and solar panels Guidance docs. Needs to be tailored to the built environment sector.
 - Provides an opportunity to collaborate with CPA, HAE, CEA and internal leadership groups such as Construction, Homes and Infrastructure.
 - In the form of a new report.
 - Within Q2 of 25/26
- **Develop more short form video and animated content aimed at site operatives and managers**
 - Much of the School's content is aimed at 'white collar' office workers. In Plant and Tools we need to reach the site operatives and managers.
 - In the form of a Sustainability Short and other short form resources.
 - Within Q3/4 of 25/26
