

# FOCUS 2025

Key focus for 25/26

To share knowledge, collaborate and develop competence in legislative and corporate requirements, circularity and good application of metrics and data

- **Basic reporting and legislative requirements**

- Producing **accessible learning on basic core topic matter aimed at key audiences including groundworkers, procurement teams, those responsible for aspects of waste and resource management etc**
- Curate accessible range of materials including development and recordings of webinars, fact sheets, links to existing resources etc,
- Develop relevant entry level learning pathway
- **Run at least one webinar devoted to this range of topics**

- **Circularity - developing practical replicable approaches**

- **Develop further case studies on circularity**
- **Support a currently informal industry group involving several School partners that is trying to solve practical challenges around uptake and use of Material Exchange Platforms**
- Develop a circular economy learning pathway
- **Host webinar and VC addressing circularity**

- **Metrics and Data**

- Build upon the work and collaborative partnerships developed during FY 24/25
- **Develop and communicate clearly defined metrics for School members and partners**
- **Produce and communicate content explaining the importance of good measurement and deliver a webinar addressing this topic.**
