

Trust Matters *Virtual Conference*

 **Thursday, 26 June 2025, 10:00 AM - 12:00 PM**  **Online (via Zoom)**

Agenda:

Trust is the invisible force that makes or breaks businesses. It's not just a 'nice to have' – it's the foundation of high-performing teams, successful projects and thriving workplaces. But in industries like construction, where projects are complex, deadlines are tight and collaboration spans multiple stakeholders, trust is often fragile and difficult to sustain.

This two-hour virtual conference will explore why trust is the most valuable asset in any business. You'll hear from industry leaders on how trust influences wellbeing, performance and project success – and how you can build it within your teams and organisation.

By joining this session you will:

- Understand what trust means and the positive impact that a culture of trust can have on your business, your employees and your stakeholders.
- Discover how improved trust can reduce stress related absences and improve workforce wellbeing
- Learn what psychological safety is and how to create safety in teams
- And more!
