

Challenges:

As Mooremack continues to expand, one of the key challenges has been managing and minimising the company carbon footprint. The business aims to reduce the number of material deliveries to project sites while still meeting demanding project schedules and maintaining operational efficiency. In addition, Mooremack strives to achieve sustainable material usage, ensuring that all unused ductwork is returned to the manufacturer for recycling, thereby minimising waste and supporting circular economy principles.

Another key focus has been enhancing the learning and development of Mooremack apprentices and the wider workforce. By engaging with Fairness Inclusion and Respect e learning modules, Mooremack seeks to strengthen the support available to apprentices and promote a culture of inclusion across the company.

Impact:

The introduction of comprehensive e learning materials has significantly enhanced the knowledge base of Mooremack team members. This learning is being actively applied across the company, helping the organisation remain fully compliant as it continues to grow.

The Wellbeing and Fairness Inclusion and Respect modules have equipped Mooremack with the tools to provide meaningful support to all employees, promoting fairness, inclusion, respect and a positive workplace culture. This proactive approach contributes not only to individual development but also to team cohesion and overall company performance.

Value gained:

The company has experienced several clear benefits from its Supply Chain Sustainability School membership including

- Networking opportunities, strengthening connections within the ventilation and construction industry
- An enhanced industry profile, recognising Mooremack as a company committed to sustainability, professional development and inclusion
- Knowledge for all staff members, improving awareness and understanding across all roles, supporting better decision making and higher standards of delivery

Future proofing:

By continuing to collaborate with the Supply Chain Sustainability School, Mooremack will benefit from expert guidance, training and resources that strengthen its commitment to sustainability, inclusion and professional
