Which issues do you think should be prioritised in Scotland Rank 1-5 importance

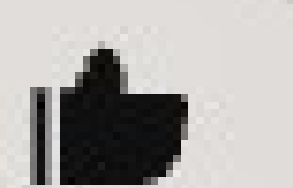

What do you feel are the key sustainability challenges for Scotland to achieve net zero by 2045 (partners targets earlier 2035/2040)

pipeline of projects
informed design
people
financial incentives
understanding
clearer long term policy
resource for smes
clear long term policy
skills base
negative nz press
politics
planning process
standardised reporting

In the priority topics identified, what would be your key areas learning should focus on?

scope 3 reporting
carbon proposal-tender
design values gains

3

Micro and small businesses make up 98.% of Scottish businesses, how can we best support them (resilience/opportunities/funding/enabling/listening)

on site engagement
meet them where they are

What can we do as partners individually and as a group collaboratively to engage the Scotland value chain (market and region)?
