

Partner Dashboards

The dashboards provide Partners with transparency of supply chain knowledge on sustainability issues and engagement with the School.

Ten tabs of live data

Filter by country, topic or market

See measurable improvement in supply chain knowledge

Pinpoint knowledge gaps quickly with your suppliers

See School engagement levels and interests

Partner Dashboards in Brief

You can download numerous graphs and metrics from the Partner dashboard, designed to illustrate and update you on your priority suppliers' engaging with the School. These metrics include, but are not limited to:

- Fully filtered data dependent on your requirements, including business units, trade category, company size, company region etc
- Customisable date ranges
- A recent trends graph illustrating the sign-up, login, and activity of your priority suppliers within a specified timeframe – customisable to your needs
- How many of these have achieved Bronze, Silver or Gold status
- Measurements as to the improvement in the sustainability competence of your supply chain
- Benchmarking tools on the competence of your supply chain compared to other members of the School
- Information on how many of your suppliers are utilising the resources available on the School
- The equivalent CPD training time (*both face to face and e-learning*) of this engagement
- Information on the most popular resources viewed by your priority suppliers
- Exportable reports and spreadsheets which provide you with a detailed breakdown of the information in your dashboard
- An additional report on which companies have registered with the School who have said that they supply to your organisation
- And much more!
