Plant Leadership Group Priorities 26-27

1

Establish a working group to develop consistent telematics metrics and KPIs

- Organisations are struggling to get consistent telematics data to use for efficiency drivers.
- There are also more people interested in how to collect Plant performance data and how to use that data for improvements.
- Provides an opportunity to collaborate with Plant rental companies and their telematics suppliers.
- In the form of new content, including a report, a template with KPIs and a sustainability short.

2

More guidance on other non-fossil-fuel alternatives to fossil fuels

- The CLC target to be 78% diesel-free on all UK sites by 2035, means the need to move away from ICE plant, and more towards electric, hydrogen, HVO or other.
- Resources are needed reviewing feasibility of Lithium-ion batteries and other power forms, similar to the HVO and solar panels Guidance docs.
- Provides an opportunity to collaborate with CPA, HAE, CEA and internal leadership groups such as Construction, Homes and Infrastructure.
- In the form of a new report.

3

Develop more short form video and animated content aimed at site operatives and managers

- Much of the Schools content is 'white collar' office workers. In Plant and Tools, we need to reach the site operatives and managers.
- In the form of two PDF sheets, a Sustainability Short and other short form resources.
